## PRICES:

Quotations in this list cancel all previous lists, and prices.

## ALL PRICES HEREIN LISTED ARE SUBJECT TO MARKET CHANGES.

To simplify listing we are quoting "Each," "Each per 100," "Each per 1000."

To apply the 1000 rate on B R items orders must call for not less than 25 plants of the same variety and size.

To apply the 1000 rate on B & B specimen plants, orders must call for not less than ten (10) plants of the same variety and size.

To apply the 100 rate on B&B specimen plants orders must call for not less than five (5) plants of the same variety and size.

When ordering samples please remit for B R items at the 100 rate, and for B&B items at the each rate.

## PACKING CHARGES:

Are extra at actual cost for all SPECIMEN B&B plants. Packing will be free on all orders for bare root plants when cash accompanies the order. There will be no packing charge whatever on bulk car-load shipments, or on orders when your truck calls at our Nursery for the goods.

## CASH DISCOUNT:

When cash accompanies the order, C. O. D. express or freight S. D. B. L. attached, will be considered cash basis provided a deposit of 25% is sent with the order, balance to be paid on delivery at destination.

## CHARGE ACCOUNT:

To customers who have established credit with us, we allow the following terms: 2% ten

days; 1% thirty days; 60 days net. 6% interest per annum charged on all accounts after date of maturity.

## TRANSPORTATION:

In placing orders please specify how your shipment should go forward—freight, second class express, or otherwise. If you should fail to give us this information, we will ship—without assuming any responsibility—the best way possible to serve your interests. Our responsibility ceases when goods are turned over to transportation company—all risk and cost of transportation belonging to purchaser.

## CLAIMS:

It is our aim to satisfy every customer. If any plants shipped you are unsatisfactory please return them immediately upon receipt of same at our expense, and we will replace promptly or refund the full purchase price. Positively no claims will be entertained unless made immediately upon receipt of goods.

## NON-WARRANTY:

We give no warranty expressed or implied as to description, or variety, quality, productiveness, or any other matter of any nursery stock, seeds, bulbs, or plants sold by us—the purchaser assuming all risks and responsibility of the transportation, and all risks as to life and growth. We quote for immediate acceptance, subject to prior sale, and to stenographic, typographical errors, or omissions. All orders are booked subject to loss, or damage, from unavoidable weather conditions, delays, and contingencies beyond our control.

A trial order will fully convince you that it will be hard to equal our splendid values elsewhere.

T. G. OWEN & SON, Inc.

A block of our specimen Biota Aurea Nana, True Berckman's Dwarf Golden Arborvitae, produced to perfection by fertile soil, wide spacing, and careful cultivation.

## Strong Young Evergreens For Lining Out

Pot Grown—Bed Grown  
Extra Heavy Field Grown

### CHOICE SPECIMEN EVERGREENS

It is very important that you read carefully here in order that you may fully understand our list: Please note the following symbols:

- T signifies once transplanted, bed grown.  
TT signifies well formed heavy grade—field grown, twice transplanted in nursery rows.  
TTT signifies specimen plants, field grown, three times transplanted in nursery rows.  
(C) signifies true to name plants, propagated from cuttings.  
(G) signifies plants grafted on understock of similar species.  
(L) signifies propagation by layering.  
(P) signifies plants well established in clay pots.  
(S) signifies plants grown from seed.  
BR signifies bare roots puddled soon as dug and roots mossed for shipment.  
B&B signifies plants dug with a solid ball of earth and securely burlapped.

**SPECIAL NOTICE:** All transplants either bed grown, or field grown, will be shipped with roots carefully puddled in heavy wet clay with moss packed about the roots to prevent drying in transit. We also use excelsior extensively in packing to ventilate the tops of our liners which fully insures against heating in transit. Our nursery soil is of splendid balling quality and all of our Specimen Evergreens dug with solid ball of earth about the roots and securely burlapped should reach destination without breaking.

**ATTENTION:** The various grades of TT and TTT BR plants offered in this list will save you

one to three years in growth if you are buying to line out. The larger grades in this class afford you the opportunity to make quick profits if you are buying to resell—JUST TRY THEM.

### (C) BIOTA ORIENTALIS AUREA NANA, Berckman's Dwarf Golden Arborvitae.

	Each	Each
	per 100	per 1000

**SPECIAL NOTICE:** For popular price items in Berckman's Dwarf Golden we offer two light B&B grades following,

	Each	Each
	Per	Per
	100	1000
10x12 in. TTT B&B, light grade	.27½	.22½
12x15 in. TTT B&B, light grade	.32½	.27½

### (C) BIOTA AUREA NANA GLOBOSA, Globe Golden Arborvitae.

(This new and extremely dwarf form of Aurea Nana is very valuable in rock garden work, excellent for tubbing, and very fine for border planting and corner planting in formal garden work. A slow compact grower which continues

(This variety continued on next page)

Orders Accepted For Any Quantity. Read Terms and Conditions of Sale.

A view of the splendid plants you will get when you purchase our strong field grown liners of Biota Aurea Nana, Berckman's. This large block discloses our method of growing, and cultivating all varieties of field grown lining out stock offered in this list.

(This variety continued from page 2)  
to gain popularity every season. Its foliage is intensely golden).

4x5 ft. TTT	B&B .....	1.05	.90

**(C) BIOTA ORIENTALIS AUREA DWARF, Dwarf Golden Arborvitae.**

(A new and extremely unusual Dwarf Golden Arborvitae. Very like Berckman's Aurea Nana in habit of growth but very much more compact, and its coloring is intensely more golden than Berckman's. Although dwarf of form it is conical and with its close fitting foliage has real merit. These plants have been carefully tested in our nursery rows, and landscape plantings.

Especially good in rock garden and formal plantings).

30x36 in. TTT B&B .....	.65	.55

(C) BIOTA ORIENTALIS DARK GREEN, Compact Pyramidal Arborvitae.

(This variety is propagated from a selected seedling. Color of its foliage is much darker green than either Bakeri, or Hill's Pyramidalis.

Very compact, wide at base, and of perfect pyramidal form. We recommend it as one of the most beautiful Oriental Arborvitae).

**(C) BIOTA ORIENTALIS HILL'S PYRAMIDAL AUREA, Hill's Golden Pyramidal Arborvitae.**

(This variety is a sport of Biota Orientalis Hill's Pyramidalis, and the plants we are offering here have all been propagated by cuttings from the parent tree which was produced by the selection and propagation of this golden tipped sport. It might be called Golden Bakers so nearly does it resemble the famous Baker's Pyramidal, except, of course, that its foliage tips are intensely golden. We think this variety has exceptional merit).

	Each	Each	
	Each	per 100	per 1000
30x36 in. TTT B&B .....	.75	.65	.60

Orders Accepted For Any Quantity. Read Terms and Conditions of Sale.

(C) JUNIPERUS CHINENSIS MASCULA.

(In our opinion this splendid variety is the very best of all the Columnar Pyramidal Chinese Juniperus. Foliage dark bluish green with touch of silver. Its habit of growth is upright, very uniform, and it will thrive in almost any situation where there is sunlight).

(C) JUNIPERUS CHINENSIS SYLVESTRIS, Sylvester Juniper.

(Often called Reives Juniper. A very unique Pyramidal type splendidly adapted for Southern and Southwestern planting owing to the fact that it will withstand heat and dry conditions without damage, or loss of coloring. But it will also withstand cold and is entirely suitable for use in colder sections of the country).

**SPECIAL NOTE:** Grades marked with an asterisk (\*) can be furnished in pots well set with buds for spring delivery. Write for quotation stating grade desired, and quantity required.

All Azaleas B&B offered are well set with buds, but as this list is being issued in the fall season we cannot guarantee spring delivery with buds by reason of the fact that sometimes Azalea buds are injured by hard freezing weather, that does not damage the plants, or foliage. However our Azaleas stood four degrees below zero in January and February of 1936, without the slightest injury. Please bear this in mind when ordering for spring delivery.

**SPECIAL NOTICE:** All grades of Abelia marked with an asterisk (\*) are extra heavy, having been cut back and carefully pruned. The plants are growing well spaced in wide nursery rows, and each plant carries a spread in proportion to its height.

Orders Accepted For Any Quantity. Read Terms and Conditions of Sale.

A mid-winter snow view of our Greenhouse range. A large area of this space under glass is used exclusively for propagating nursery stock.

My job is production, and sales. If you see me at the conventions, and I haven't had the honor of making your acquaintance, please say "hello" and permit me to shake your hand. I'm anxious to know all of my fellow craftsmen.

HERMAN M. OWEN,  
General Manager.

### LOCATION AND CLIMATIC CONDITIONS

Columbus is situated ninety miles due west of Birmingham, Alabama, as the crow flies. Our nursery is located on the St. Louis and San Francisco Railroad. We have its spur tracks adjacent to our packing and loading sheds which provides quick and efficient shipping facilities.

We have cold winters, temperatures often near zero, sometimes below. As a result of this our stock remains dormant long enough in spring seasons to enable us to serve our northern friends in just as satisfactory a manner as we can serve those in nearby areas. Our elevation is 240 feet, normal rainfall 51 inches, of which approximately 25 inches fall during our summer growing season.

### EQUIPMENT WE ARE PROUD OF

One thousand acres of the finest land in northeast Mississippi. Propagating facilities that cannot be excelled. Artesian wells from which mother nature pours more water than we can ever use. The nine big stacks above no longer belch black smoke, we're now heating with natural gas, no dirt, or dust, no coal to haul, or refuse ashes to clean out.

Huge pumps driven by natural gas engines which deliver an unlimited supply of water into the mains of every greenhouse at 100 pounds pressure, and through Skinner irrigating lines which cover several acres of ground and lath sheds.

My job is office management. I, too, make the conventions with my husband. I'm anxious to make new friends in the trade, and meet all of our customers personally.

MRS. H. M. OWEN,  
President.

# T. G. OWEN & SON, Inc.

Everything in this list is well grown, well graded, and we promise to ship nothing but the very best to our customers.

We do not have any agents in our employ, and positively do not authorize dealers to use our name. This list is intended for the Trade Only, and should it reach anyone not entitled to Trade Prices, will thank any Nurseryman, Dealer, or Florist to advise us so that we may revise our mailing list accordingly.

Orders Accepted For Any Quantity. Read Terms and Conditions of Sale.

# TRADE LETTER

## TO OUR FRIENDS AND PATRONS:

Last season one of our friends who was visiting us for the first time told us cold turkey we were making a big mistake not to tell the trade more about ourselves. He said, quote,

“Why you have a lay-out here second to none, with equipment, and production facilities undreamed of. You have rich lands, and enjoy excellent growing seasons. I advise you to tell the trade more about yourselves, ask them all to come, and see for themselves the real growing establishment you have succeeded in developing.”

Friends we're doing that very thing. In our modest way, and without a large expenditure of money, we have put together for your consideration a larger catalogue which is better in so far as we are able to make it than the small booklet it has been our usual custom to send out. The pictures herein are genuine photographs of our own stock, land, and buildings. Next year, if we can do it, our catalogue will be bigger, and better than this one. We firmly believe our friend to be right in his surmise. If we don't tell you folks about ourselves how can we expect you to know and like us.

For the benefit of those who are not familiar with our location we have published on the back cover of this catalogue a map showing our situation relative to well known points in other States.

Please come to see us, and should you wish to buy we will offer you our best at prices you can afford to pay; but whether you buy or not we'll be glad to show you all we have and do everything to make your visit worth while.

Thanking you for your consideration, and with every good wish, we remain,

Yours very truly,  
T. G. OWEN & SON, Inc.  
Columbus, Mississippi.

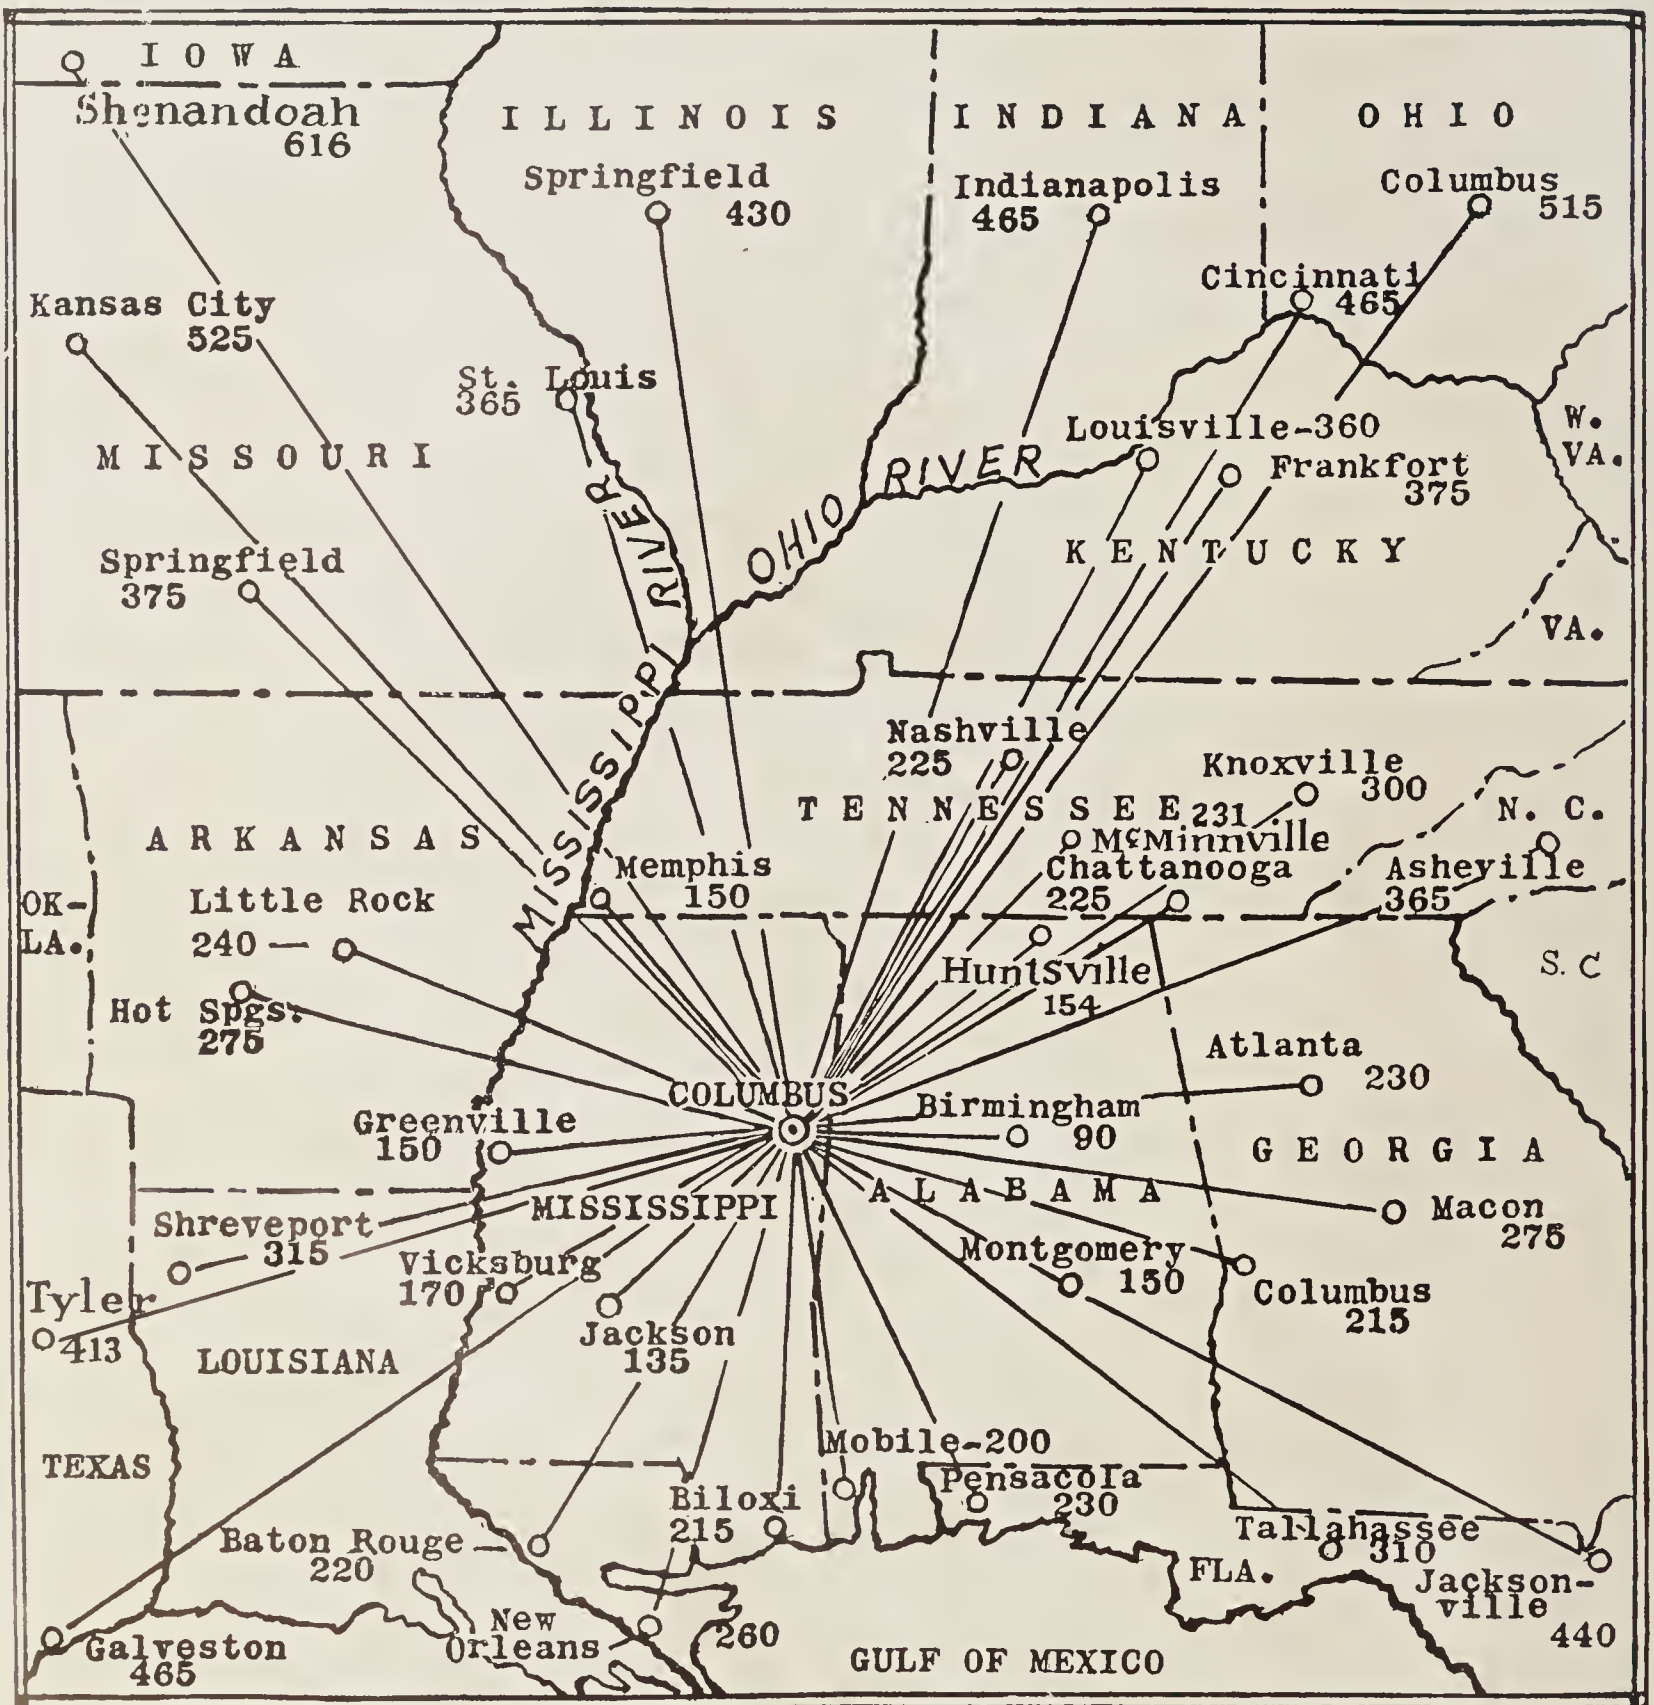

TOP—Through the summer growing seasons these Tractors are equipped with two row cultivators. Each one of the three cultivate twenty to twenty five acres of young nursery stock a day, and they do a neat job of it.

BOTTOM—Our big F 30 Farmall Tractors on rubber tires. Believe us they do a real job of turning under the Vetch cover crops illustrated on page 17.

Figures indicate distance in miles to Columbus, Miss., "as the crow flies."

We extend members of the trade, north, south, east, and west a cordial invitation to visit us. Come any old time you can, and welcome. Honest and genuine Southern Hospitality awaits you here.
